

Deepen Activities

- 1 480 seconds after 3 minutes to twelve is 9 minutes before 12:14. True or false. How do you know?

I wonder if I could make up a question like this for someone else to solve.

- 2 Create a timetable for five sport events. Write each of the times in three different ways. First in words, then the 12-hour clock and the 24-hour clock.

I think there is a fourth way. I could draw an analogue clock.

- 3 Create a word problem for your partner to solve where they have to convert from minutes to hours.

The answer should be 1 hour and 48 minutes.

Can you create more than one problem? Use a different operation.

I will try writing a question that uses multiplication.
