

## Deepen Activities

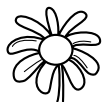

- 1 Mia counts 3 equal groups of pencils with a total less than 20.

What could the total be?

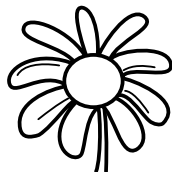

I'm going to think about different group sizes, starting with groups of 1.

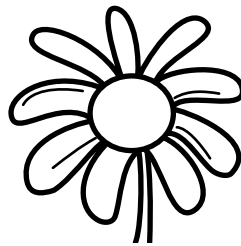

- 2 Amit has planted a magic flower. Each day, its height doubles.

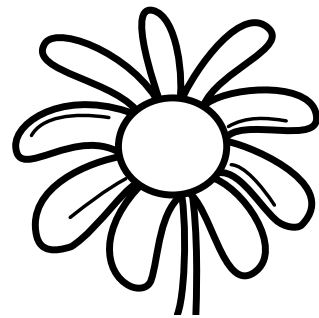

Day 1

Day 2

Day 3

Day 4

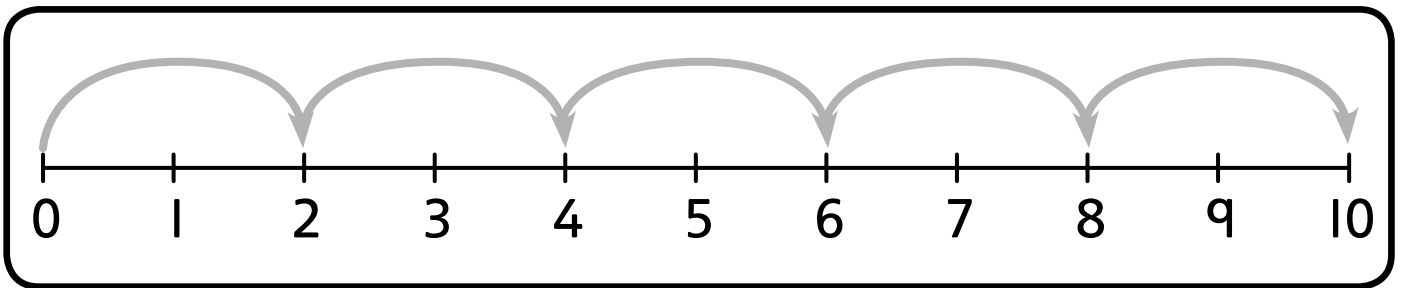

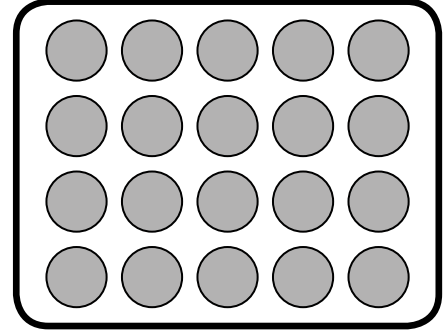

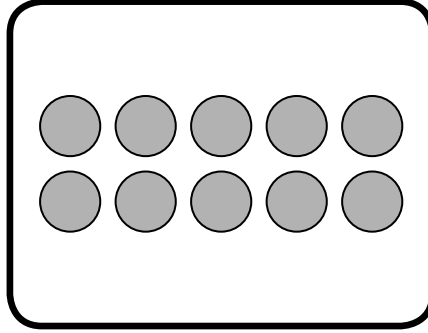

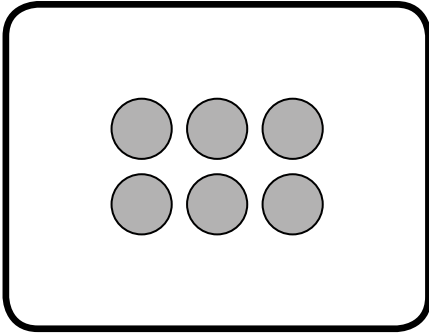

On day 1, the flower is 1 cm tall. How tall will it be on day 4?

I need to work out how tall it will be on day 2 first.

3

a) Write a story problem to match each picture.

b) Ask your partner to match the story problem to the picture.

Can you draw your own picture and create a story to go with it?

I'm going to write a story about seeds and plant pots.
