

Deepen Activities

- 1 Use the pictogram to create a bar chart.
Make sure to include a title and labels.

**Number of tickets sold
on Monday**

	Number
adult	   
child	    
over 60	 

Each  represents 12 tickets.

I do not think
using intervals
of one will be a
good idea here!

- 2 a) Make up your own line graph about the temperature in a day.
b) Write four questions about your line graph for a partner to answer.

I could include questions that
compare the temperature at
different times of the day.

- 3 Here are the answers to two questions about some data:

15 more people prefer Chocolate to Strawberry. 7 fewer people prefer Vanilla to Mint Choc Chip.

Draw a table to show what this data could be.
