

Deepen Activities

- 1 Create a factsheet with pictures to show facts about conversion between metric and imperial units of measurement.

You can show units for measuring length, mass or capacity.

I think I will put some questions in my factsheet!

- 2 A furlong is 10 chains. A chain is 22 yards. A yard is 3 feet.
 - a) Approximately how many centimetres are there in a furlong?
 - b) Make up a similar question of your own using imperial measures of mass.

- 3 The answer is 2.75 days.

Create three word problems that all have this as the answer; one easy question, one medium question and one super challenge question!

I wonder how many hours there are in 2.75 days?
