

Deepen Activities

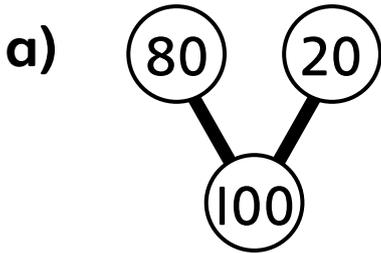

- 1 Add in the numbers that are missing from this section of a 100 square.

| | | | | |
|----|----|----|----|----|
| 16 | | | 19 | |
| | 27 | | | |
| 36 | | | | |
| | | | 49 | |
| 56 | 57 | | 59 | |
| | 67 | 68 | | 70 |

I'm going to use the number patterns in a 100 square to help me.

2 Write a story problem for these bonds to 100.

b) $50 + 50 = 100$

I will write a subtraction problem.

3 Max is thinking of a number.
It is greater than 50.
It less than 62.
It has 5 ones.

- a) What is Max's number?
- b) Pick a number and give your partner clues to work it out.

How can I make sure my number can't be worked out until my last clue?
